

REMARKS

Making reference to the Office Action Summary it is noted that the claim for foreign priority has been acknowledged and further that all of the certified copies of the priority documents have been received by the Patent Office.

Responsive to the Restriction Requirement and to 35 U.S.C. Section 121, Applicant herewith elects Species II, Embodiment 2, Figs. 7-24.

The claims readable thereon are claims 1 through 8, 10, 11, 13, 15 through 22, 24 and 25.

Applicant submits that claims 9 and 23 correspond to Figure 27 of Species III, Embodiment 3.

The invention recited in claims 12 and 14 relates to a DMD.

In addition to the election of Species II, Applicant herewith partially traverses the species set forth by the Examiner. More specifically, the Examiner has included Figures 31-35 as part of Species III. Applicant submits that Figures 31 through 35 should properly be included in Species II since Figures 31 through 35 are explanatory views showing the method of controlling a current and thus are more appropriate for inclusion in Embodiment II, which covers the method of controlling a current rather than inclusion of Figures 31 through 35 as part of the III Species, which is related to a sequence as represented by Figure 27. In addition

Applicant: Shinzo Matsui
Application No.: 10/635,192

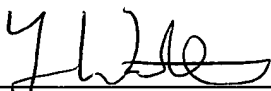

thereto, Applicant submits that claims 6 and 20 correspond to Figures 31-35 and therefore should be included in the claims readable on Species II.

Favorable action regarding the modification of the enumerated species and examination of the elected claims is earnestly solicited.

If the Examiner believes that any additional minor formal matters need to be addressed in order to place this application in condition for allowance, or that a telephone interview will help to materially advance the prosecution of this application, the Examiner is invited to contact the undersigned by telephone at the Examiner's convenience.

Respectfully submitted,

Shinzo Matsui
